

Gaurav Nandankar *Software Development Engineer*

Shantivan Besthan, Surat

Profile

Versatile .NET & Angular Developer with a strong foundation in backend systems, API development, and mobile apps. Experienced in building scalable solutions using .NET Core, Angular, and Android SDK, while collaborating across teams to deliver high-quality, client-focused applications.

Professional Experience

Digitalline Infosys

Software Engineer

Nov 2023 – Present | Surat

- Develop business solutions by designing .NET Web APIs, building Angular modules, and optimizing performance with clean architecture. Manage client communications, lead requirements gathering, and mentor junior developers to ensure quality and best practices.

Significant Infotech Pvt Ltd

Intern Software Developer

Jun 2022 – Sep 2022 | Surat

- Contributed to native Android app development, gaining hands-on experience in UI design, development, and team workflows.

Junior Software Developer

Sep 2022 – Nov 2023 | Surat

- Built over 30 Android apps using Java/Kotlin, including 15+ from scratch. I enhanced performance, integrated APIs, and collaborated with design and QA teams.

Education

Veer Narmad South Gujarat University

BCA (Bachelor of Computer Applications)

Aug 2019 – Jul 2022 | Surat

CGPA :- 9.11

Gujarat Secondary and Higher Secondary Education Board, Gandhinagar

12th (Sunflower English High School)

Jun 2018 – Mar 2019 | Surat

PERCENTILE :- 75.42

Certificates

ADCA (Advance Deploma in Computer Education) -
Feb 2019

Facilitate with Academic Excellence Certificate on 26th
January 2023

Skills

Frontend

- HTML, CSS, JavaScript, TypeScript, Angular, Bootstrap, Android (UI), Blazor (basic), Figma (UI collaboration)

Backend

.NET Core, C#, Java, Kotlin, Firebase, REST APIs, Entity Framework, Dapper, ADO.NET

Databases

MSSQL, PostgreSQL, SQLite, Redis

Tools & Platforms

Git, Postman, Figma, Android Studio, Visual Studio, Azure (basic), Docker, Github Actions, Message Brokers

Projects

ProRanked

Developed microservices backend using .NET Core and MSSQL to manage public EV charging stations. APIs for charger provisioning, dynamic pricing, session tracking, and payment processing. Built Angular dashboard and Android client, integrating Azure and Minio for storage and scalability.

Technologies: .NET C#, Evertec (Payment Processing), Microservices, MSSQL, Stripe, Entity Framework, Azure, Minio, Android, Angular,

TimeTrackingTool

Architected a multi-tenant project and employee management system with .NET Core and Angular. Enabled real-time time logging, project assignments, and approval workflows, improving reporting efficiency by 30%. Integrated Redis caching and Docker deployment with GitHub Actions.

Technologies: .NET C#, MSSQL, Entity Framework, Angular, Redis, Docker, GitHub Actions, JWT, Serilog, Stripe, HtmlToPdf

Technician – Service Operations Platform

Built a centralized service/task management solution with .NET 8 APIs and Angular frontend. Implemented JWT-secured, role-based access, media upload endpoints, and dynamic PDF report generation. Supported responsive mobile and web clients with real-time updates and Serilog-based logging for traceability.

Technologies: .NET 8, C#, MSSQL, Entity Framework Core, Angular, JWT, Serilog, Docker, GitHub Actions, Redis, HtmlToPdf
